## Tired of your window covering bids not “sticking”?

### The Problem: Every window covering bid looks the same.

Sending the PDF estimates created on supplier website doesn't offer much of a chance to be better than the competition, but that ALL CHANGES with StickyBid!

### Stop looking like the competition! Start winning more by being sticky.

When you use StickyBid to send your window covering estimates you will connect better with customers. By using dynamic visual elements like pictures, videos and other supporting content to tell your unique brand story you will have a higher chance of winning the job.

**\*Graham increased his win rate by 72% with StickyBid\***

## MEET GRAHAM.

He's just like you, except he probably closes twice as many window covering bids.

Like you, Graham sells window coverings and he's been doing it for 3 years. Before StickyBid his process was to go through the grind of making Hunter Douglas, Graber and Shad-o-matic window coverings estimates for prospects through their websites. Then he would send the PDF to customers by email. This process resulted in a win rate of 28%.

Then Graham started using StickyBid to send his PDF estimates, allowing him to include valuable information about his family owned business, his story, his installers, satisfied customers, and so much more, and boom!

**His win rate increased to 47%. Not too shabby if we do say ourselves!**

How does Graham feel with StickyBid?  
Pretty, pretty, pretty good.

**“ I think it's a black and white customer experience difference from what I was doing before. I have a level of confidence that when I send estimates, through StickyBid, they hit harder, they communicate more, and they certainly have an impact on my win rate, compared to sending an attached PDF to an email.”**
